PATIENT & TEST INFORMATION

Patient Information

Patient Name: N/A
Patient ID: N/A
Age: N/A
Gender: N/A

Test Information

Test ID: 1772792296
Test Date & Time: 2026-03-06 15:48:16
Test Type: AI-based Multimodal Screening

PREDICTION RESULT

Prediction Result

Parkinson's Disease Detected

Confidence Score	Risk Level	Disease Stage
90.0%	**High**	**Stage2**

What does this mean?

Your risk level is High. The analysis shows indicators that may suggest Parkinson's disease. Clinical confirmation is recommended.

TEST DATA SUMMARY

Image Uploaded: N/A (N/A)
Voice Uploaded: N/A (N/A)
Voice Sample Duration: N/A sec

Test Date & Time: 2026-03-06 15:48:16
Analysis Time: N/A sec
Model Version: NeuroScan AI v1.2
Input Data: Spiral Drawing Image, Voice Sample

REPORTED SYMPTOMS

Tremor: No
Slurred Speech: No
Handwriting Difficulty: No

Fatigue: No
Balance Issues: No

Phone: +1 234 567 890
Email: info@neuroscan.ai
Website: www.neuroscan.ai

AI ANALYSIS DETAILS

Model Type: Deep Learning (CNN + Machine Learning)
Features: Spiral pattern + Voice MFCC features
Processing Time: N/A sec
Voice Stability: N/A
Handwriting Smoothness: N/A
Previous Test: N/A (N/A) | Trend: N/A

RECOMMENDED ACTIONS

- Schedule neurological examination
- Repeat screening after 3-6 months
- Monitor tremors, stiffness, or speech difficulty

LIFESTYLE GUIDANCE

- Maintain regular physical activity
- Eat balanced meals
- Get 7-9 hours sleep
- Reduce stress

Emergency Advisory
Immediate medical consultation is recommended.
